TITAN FUEL TANKS: THE LEADERS IN FUEL CAPACITY SOLUTIONS SINCE 2003

At Titan Fuel Tanks, we specialize in designing and engineering innovative, high-capacity fuel tanks that meet the rigorous demands of drivers who rely on their vehicles for both work and adventure. Since 2003, we have been dedicated to improving vehicle capabilities by extending fuel ranges, significantly reducing refueling stops, and offering solutions tailored to those who depend on their vehicles.

Our tanks are built from High-Density Cross-Linked Polyethylene, which ensures maximum durability and resistance to the toughest elements, providing unmatched reliability in the harshest environments. Additionally, our products are backed by a lifetime warranty, demonstrating our confidence in their quality and our commitment to customer satisfaction.

Proudly made in the U.S.A., in our facility located in Idaho Falls, Idaho, our products are trusted for their superior strength, seamless construction, and commitment to American craftsmanship. With Titan Fuel Tanks, you're investing in durable, high-performance products that are built to last and designed to empower you to take on any journey, no matter the challenge.

THE MOST CAPABLE XXL FUEL TANKS EVER DESIGNED: INTRODUCING THE NEW *GEN 7* XXL REPLACEMENT TANKS

COMING IN 2025

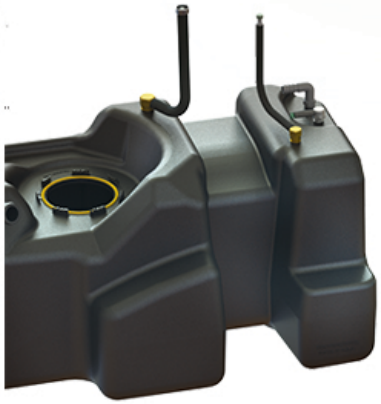

Titan Fuel Tanks, the leader in fuel tank innovation, is once again revolutionizing the industry with the release of the new Gen 7 XXL Replacement Fuel Tanks. Our tanks are the most advanced and capable XXL fuel tanks ever produced. Constructed from our renowned High-Density Cross-Linked Polyethylene (XLHDPE), they offer unmatched durability, surpassing any other fuel tank on the market.

The Gen 7 tanks also boast three innovative new features to maximize versatility: A fast fill vent kit for hassle free fueling at high-flow truck stop pumps, a universal pickup tube compatible with high-pressure fuel systems, and a transfer pump kit, allowing you to conveniently fuel other vehicles directly from your XXL replacement tank. Titan's Gen 7 tanks are designed to meet the needs of diesel truck owners who demand more from their fuel tanks.

INTRODUCING THE NEW *GEN 7* XXL REPLACEMENT TANKS

COMING IN 2025

The Fast Fill Vent Kit enables the Titan Gen 7 XXL Replacement Tank to fuel seamlessly at high-flow truck stop pumps, ensuring a smooth and rapid fill-up with no pressure buildup or spillage. This makes Titan the *ONLY* XXL replacement fuel tank on the market capable of handling high-flow truck stop pumps, allowing you to refuel faster and get back on the road in less time.

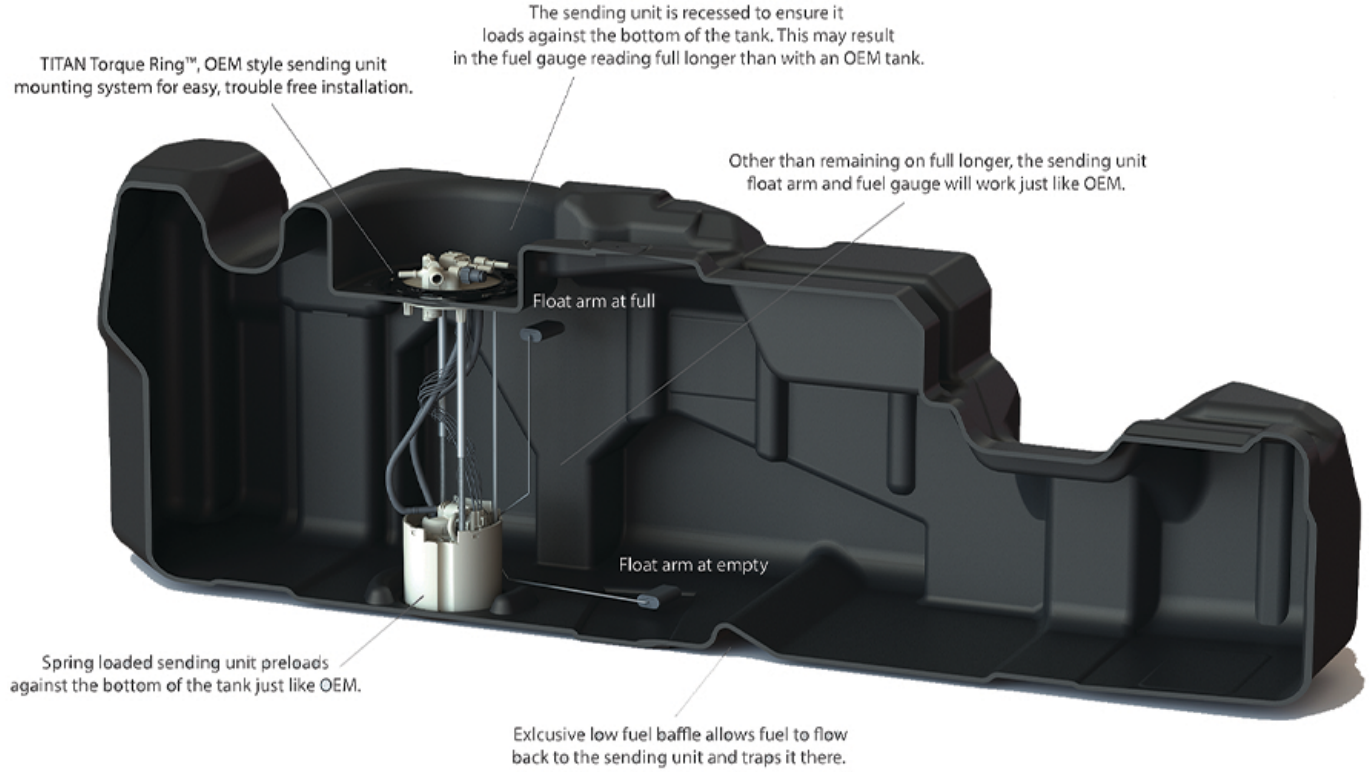

The Universal Pickup Tube and Return System is a game-changer for those utilizing high-pressure fuel systems. This versatile feature is compatible with a wide range of fuel systems including Fass and AirDog. The design ensures a reliable connection, allowing for optimal fuel flow and efficient operation. With this innovative pickup tube and return, you can enjoy peace of mind knowing that your Titan Gen 7 XXL Replacement Tank is equipped to handle the demands of high-performance fuel systems.

The Transfer Pump Kit enables you to effortlessly draw fuel from your Titan Gen 7 XXL Replacement Tank to refuel other vehicles, equipment, and more. This versatile kit is engineered with a universal pump mounting bracket, ensuring a sleek and convenient fit in the bed of your truck. With its user-friendly design, the transfer pump kit allows for quick setup and operation, making it easy to share fuel without compromising substantial amounts of bed space.

XXL MID-SHIP REPLACEMENT TANKS

Titan's XXL Replacement Fuel Tanks are designed to dramatically increase your truck's fuel capacity by replacing your stock fuel tank with a much larger Titan Tank, allowing you to travel farther with fewer stops. Constructed from ultra-durable, High-Density Cross-Linked Polyethylene (XLHDPE), these tanks are built to endure the toughest conditions without compromising their integrity. Our tanks are specifically engineered to fit within the unused space beneath your truck, with minimal hang-down to maintain off-road performance. At Titan, we focus on usability over sheer capacity, because we believe trucks should be practical for everyday use in any situation. Our XXL replacement tanks are an easy, bolt-in upgrade that delivers exceptional functionality. Backed by an industry-leading lifetime warranty, Titan Fuel Tanks offers reliability and peace of mind for the long haul.

CAB & CHASSIS REPLACEMENT AND AUXILIARY TANKS

At Titan Fuel Tanks, we know that cab and chassis truck owners need to focus on getting the job done, which means keeping their trucks running longer without interruptions for refueling. That's why we've developed our line of XXL Replacement and Auxiliary Fuel Tanks, designed to significantly extend your fuel range, allowing you to spend more time working and less time at the fuel station.

With the addition of a Cab and Chassis Auxiliary Kit, our XXL Replacement Tanks can seamlessly function as auxiliary tanks, offering enhanced capacity for trucks that already have an after-axle tank.

We also offer two exceptionally durable replacement after-axle tanks (part numbers 8020011 and 8020099) that address a common issue with metal factory tanks—delamination. Our tanks eliminate this problem by being constructed from our renowned High-Density Cross-Linked Polyethylene (XLHDPE), backed by a lifetime warranty.

When it comes to maximizing fuel capacity and keeping your cab and chassis truck on the job, Titan Fuel Tanks delivers the performance and durability you can trust.

TRAVEL TREKKER IN-BED AUXILIARY FUEL SYSTEMS

Titan's Travel Trekker auxiliary fuel systems are the most advanced in-bed fuel solution for those seeking additional fuel capacity and hassle-free fuel transfers. Available in 50 and 40 gallon capacities, these tanks are built from durable, High-Density Cross-Linked Polyethylene (XLHDPE) and are backed by a lifetime warranty. The Travel Trekker tanks are compactly designed to take up minimal bed space. They are also compatible with most tonneau covers and in-bed hitches, providing an efficient and space-saving solution for extended fuel range.

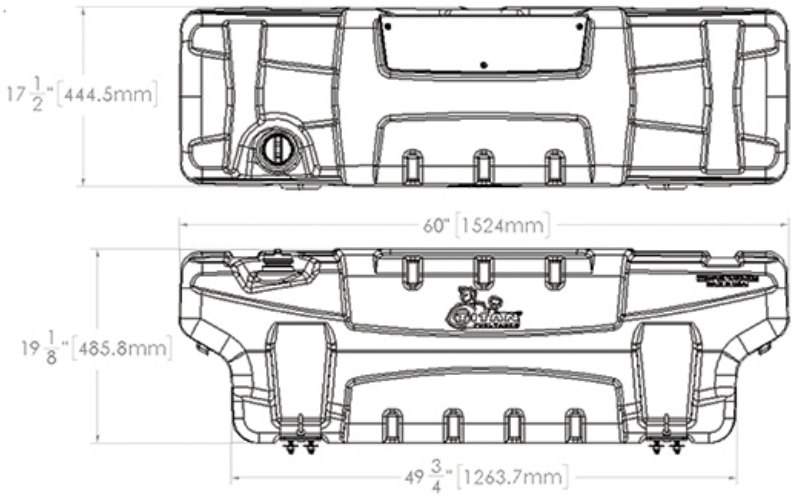

What truly sets the Travel Trekker apart is Titan's easy-to-install electronic controller, which enables seamless, on-the-fly fuel transfers to your vehicle's main tank while driving. This feature allows you to stay focused on the road, free from frequent refueling stops. Additionally, the controller includes a fuel level indicator for simple monitoring of your fuel status. Unlike other auxiliary tanks on the market, it is designed not to invade the truck's wiring harness, ensuring a simple installation that won't affect your truck's factory warranty.

TRAVEL TREKKER 50 GALLON
5410050

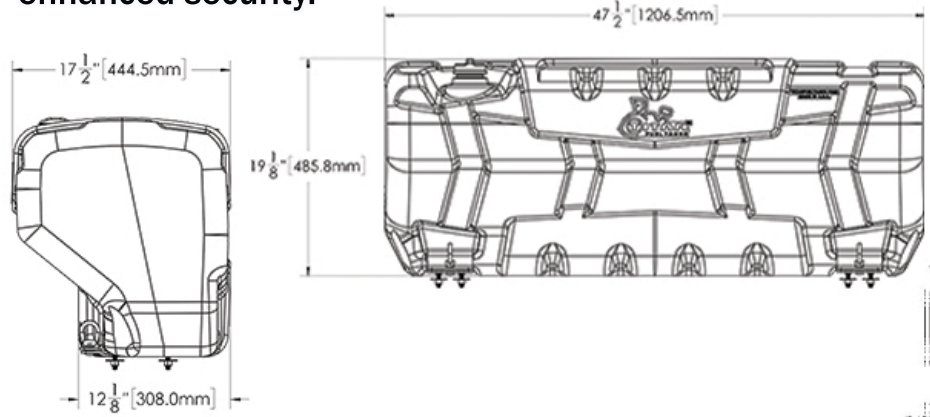

The Travel Trekker 50 is the perfect solution for full-size diesel trucks with standard beds. This auxiliary tank is not only durable but also boasts a sleek appearance that enhances your truck's look. It is baffled to prevent fuel slosh and features a locking cap for added security.

TRAVEL TREKKER 40 GALLON
5410040

The Travel Trekker 40 is a top choice for both full-size and mid-size diesel trucks, including models with standard and non-standard beds like the RamBox. This auxiliary tank offers impressive durability and a sleek design that enhances your vehicle's appearance. It is baffled to minimize fuel slosh and includes a locking cap for enhanced security.

IN-BED TRANSFER TANKS

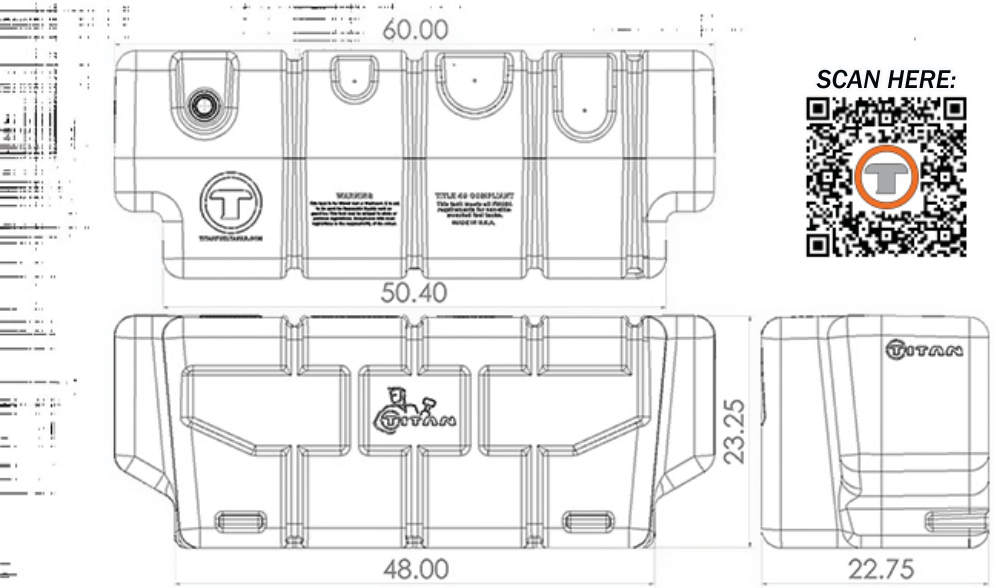

Introducing Titan's line of in-bed transfer tanks, engineered for those who demand strength, durability, and reliability. Available in 90 and 100 gallon capacities, these tanks are the strongest and longest lasting on the market due to being constructed of our High-Density Cross-Linked Polyethylene (XLHDPE). Unlike conventional metal tanks, our material eliminates the risk of rust and leaks commonly associated with welded seams. This innovative material also provides exceptional resistance to impact and harsh environmental conditions, ensuring your tank withstands the rigors of any job site or adventure.

To prove their durability, we subjected our tanks to a rigorous test, dropping them from 60 feet fully loaded and survived without any leaks. In contrast, a metal competitor failed to withstand even a 15 foot drop, showcasing the unmatched resilience of our tanks. You can view the incredible test video on our website.

Titan’s in-bed transfer tanks are built to last longer than the truck they are installed in, which is why we back them with a lifetime warranty. With a Titan Transfer tank, you can trust that your fuel will remain safe and secure, no matter where your journey takes you.

100 GALLON IN-BED TRANSFER TANK

5015100

The Titan 100 Gallon In-Bed Transfer Tank is the ultimate solution for heavy-duty fuel transport. Designed with durability and functionality in mind, this transfer tank is constructed from High-Density Cross-Linked Polyethylene (XLHDPE), making it the toughest tank on the market. Proven through extreme testing, Titan's 100-gallon tank can withstand even the most demanding environments, offering complete resistance to rust, corrosion, and leaks.

Key Features:

Full Baffling System: Designed to reduce sloshing during transit, providing enhanced stability and safer transport.
2-Inch NPT Fitting: Compatible with all common transfer pumps for seamless fuel transfer, offering versatility and convenience on any job site.
Easy Drain Plug: A simple-to-use drain plug allows for hassle free maintenance.
Locking Cap: Secures your fuel with a durable locking cap to prevent unauthorized access.
Optional Solenoid Gravity Feed Kit: Available for those who want to use the transfer tank to fill the truck's main tank, providing an additional level of convenience for long hauls.

90 GALLON IN-BED TRANSFER TANK

5015090

The Titan 90 Gallon In-Bed Transfer Tank is the ideal choice for fuel transport and storage versatility. This tank is crafted from High-Density Cross-Linked Polyethylene (XLHDPE), making it the toughest tank in the industry. Tested under extreme conditions, Titan's 90-gallon tank is designed to handle the harshest environments, offering complete resistance to rust, corrosion, and leaks.

Key Features:

L-Shaped Design: Engineered to be compatible with most toolboxes and offers built in mounting locations.
Full Baffling System: Minimizes fuel sloshing.
2-Inch NPT Fitting: Compatible with all common transfer pumps, allowing for quick and efficient fuel transfer wherever you need it.
Easy Drain Plug: A simple-to-use drain plug allows for hassle-free maintenance.
Locking Cap: Secures your fuel with a durable locking cap to prevent unauthorized access.
Optional Solenoid Gravity Feed Kit: Available for those who want to use the transfer tank to fill the truck's main tank, providing an additional level of convenience for long hauls.

SPARE TIRE AUXILIARY FUEL SYSTEMS

Titan’s Spare Tire Auxiliary Fuel System is an innovative solution designed to maximize your vehicle’s fuel capacity without sacrificing valuable bed space. Installed discreetly in the spare tire location, this auxiliary system adds 30 gallons of fuel capacity, making it perfect for longer trips, demanding jobs, or off-road adventures. Constructed from Titan's signature High-Density Cross-Linked Polyethylene (XLHDPE), it delivers unmatched durability even in the toughest conditions.

The Spare Tire Auxiliary Fuel System features Titan’s easy to install electronic controller, which enables seamless, on-the-fly fuel transfers to your vehicle’s main tank while driving. This feature allows you to stay focused on the road, free from frequent refueling stops. Additionally, the controller includes a fuel level indicator for simple monitoring of your fuel status. Unlike other auxiliary tanks on the market, it is designed not to interfere with the truck's wiring harness, ensuring a hassle free installation that won't affect your truck's factory warranty.

TRAIL TREKKER II

The Titan Trail Trekker II Fuel Tank is a versatile solution for those who need extra fuel capacity for long trips or off-road excursions. With an additional 12 gallons of fuel storage, this tank mounts easily on factory or most aftermarket rear spare tire carriers, making it a practical and stylish option for a wide range of vehicles. Whether you're traveling long distances or exploring remote locations, the Trail Trekker II ensures you have the extra fuel to keep going.

Built from Titan's ultra-durable, High-Density Cross-Linked Polyethylene (XLHDPE), the Trail Trekker II is fully resistant to sun degradation, corrosion, and leaks, ensuring reliability in any conditions. The included Shaker Siphon allows for quick and easy fuel transfer to your vehicle's main tank, ensuring you always have access to fuel when needed. Backed by Titan's lifetime warranty, the Trail Trekker II is built tough, delivering unmatched durability and rugged performance you can rely on, no matter how rough the road gets.

SIDEKICK II

The Titan Sidekick II is the perfect solution for increasing your fuel capacity while keeping your truck bed fully functional, effectively making 5 gallon gas cans obsolete. With a generous 15 gallon capacity, this tank ingeniously mounts over the wheel wells, maximizing the usable area of your truck bed. Designed to maintain its attractive appearance, the Sidekick II is built to never fade in the sun, ensuring long lasting durability.

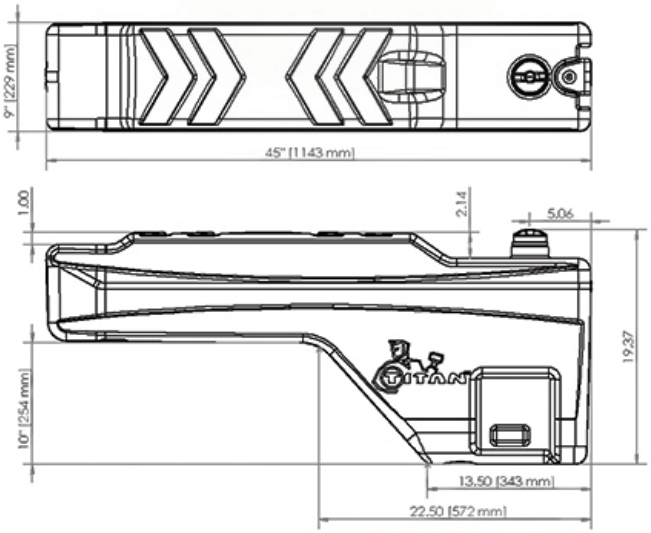

Equipped with a secure locking cap, this versatile tank is compatible with gasoline, diesel, diesel exhaust fluid (DEF), and other flammable or nonflammable liquids. It's ideal for refueling your own truck, as well as motorcycles, generators, lawn mowers, and more. The included Shaker Siphon allows for simple and efficient fuel transfer, while optional electric transfer pumps are available for faster refueling. The Sidekick II can be mounted in any corner of the truck bed on most full-size trucks and even on some trailers, providing flexible installation options.

With the Titan Sidekick II, you can say goodbye to bulky gas cans and enjoy a streamlined, efficient fueling solution that meets all your needs.

SIDEKICK II

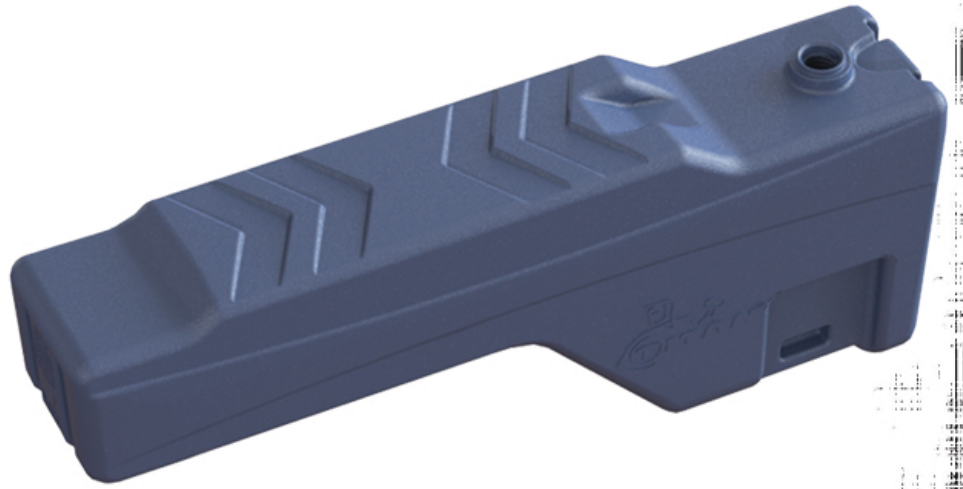

HYDROKICK

COMING 2025

We're excited to announce the upcoming release of the HYDROKICK in early 2025! A potable water version of the popular Sidekick II. Designed for adventurers and off-road enthusiasts, the HYDROKICK allows you to carry extra water, ensuring you stay hydrated or have water for basic needs during your outdoor excursions. Whether you're navigating rugged terrain or exploring remote locations, having additional water on hand is essential for safety and comfort.
